DESTINATION**

## Waterfowl hunting

Using dogs for retrieval it's a pleasure to see these experts at work working. Along the migration corridor, we target Snow's and Canadian Geese as well as Mallards. Each morning we hunt the fields, if limits of snows or mallards isn't reached in the morning, we hunt the marshlands in the evening.

In today's world, it's really tough to find authenticity. You never know who you are actually talking too, and if the person you are speaking to even knows the industry, and we understand that. Personally, I am so proud of what WTO/GGO has become. I have worked hard in the past 25 years, to be in the field, boots on the ground, out on the trails and personally overseeing every aspect of the business. I have surrounded myself with key staff and partners who love this place like I do. Everything we do, all the sacrifices and hard work is because we want to succeed, which is why we have 80% return customers. I can't wait to see your smiles in camp.
